

cdr-vcenter

cdr-vcenter is our vCenter server, which all our ESXi hosts are connected to. It is a virtual machine set up from vCenter Server Appliance 6.7, and replaced [cdr-vcenter1](#) in Spring 2019. This machine is currently joined to Active Directory, allowing any user to login into it (via RDP).

Host Information

- IP: 128.205.44.166
- vCenter Cluster: MANAGEMENT
- vCenter Datastore: [cdr-iscsi1](#)

Access Control

To learn more, contact [✖ aibekzhy](#), [✖ djmurray](#), [✖ kpcleary](#), or [✖ sjames5](#).

Notes

- This VM is pinned to [cdr-vhost45](#), and is configured to automatically start whenever that VM host boots.
