

CSL Documentation

The CSL (Cyber Security Lab) is our dedicated room for upper level UBNetDef students to practice using physical hardware. Most of this room was built in 2016 by Aaron Fiebelkorn and James Droste. To keep from their spirits from haunting you, you **must keep the room clean and tidy**.

Location

The CSL is located in **Jacobs Management Center, room 323**. To get access to this room, you will need to talk to  [Dave Murray](#).
