

# How to Upload Lectures to the UBNNetDef Website

This documentation only provides information of how to upload lectures and PDFs in general with how updated it is to the current build of our website.

## Step 0: Get Access

- Talk to the... "Web Dude"

## Step 1: Git Bash

- <https://git-scm.com/downloads>

## Step 2: Clone

- Make a folder in your home directory named UBNNetDef then cd into that directory.
- Clone the website `git clone https://github.com/ubnetdef/website.git`
- Open the folder in your favorite text-editor.

## Step 3: Copy Previous Semester

- These are typically our core lectures, so all these files should roughly be the same.
- Now update the `01_Welcome.md` file to reflect this semester.
- Then go through each lecture and rename and change the code that needs to be updated.

```
--- #in the code on Github there will be **no** space, I needed one so Doku
would read it differently
date: "2019-02-14"
title: "Networking + Topology + Activity" #change this to reflect website
schedule

course: "Systems Security"
semester: "Spring"
year: 2019
author: "Destiney Plaza"

slug: "Networking + Topology + Activity" #change this to reflect website
schedule
navbar_active_link: "lectures" #keep this the same!
```

```
summary: | #you need this bar
  Let's dive deep into Networking.
  We will be starting from the ground up.

slides: "/slides/spring2019/Coming_Soon.pdf" #this is where the slides are
stored to show up

has_page: false #different from Welcome slide, this just makes it auto-show
the lecture as a PDF
--- #in the code on Github there will be **no** space, I needed one so Doku
would read it differently
```

## Step 4: Slides in New Folder

- will need to put the slides in a new folder under /slides/spring2019/Coming\_Soon.pdf where spring2019 will be different for you.

## Step 5: Commit Your Changes

- `git add -A`
- `git commit -m "some descriptive message here"`
- ``git push`

## Step 6: A Typical Commit

This is what adding one week's worth of material will probably look like.
