

How do I create a page?

stephenorjames - 10:21 PM @vince Use the search box to search for the page with the name you're planning to use. Since a page with that name shouldn't exist (by the definition of a "new" page), you'll see something like this: You can find the results of your search below. If you didn't find what you were looking for, you can create or edit the page :<your new page name>, named after your query.

Click the link :<your new page name> to go to the edit page for your new page.

Might be worth considering the namespaces (or page prefixes or whatever DokuWiki calls them) to make sure things remain somewhat organized.

How to delete you ask?

- Edit the page you wish to get rid of... delete everything... save page...
